Enero, period 3/*periodo 3*

Where/*donde*? Ep 08

We are the creditors of a historical, social and ecological debt!

* Ecological debt is "the accumulated historical and current debt which Northern industrialised countries – their institutions and corporations – owe to the countries of the South for having plundered and used their natural resources, exploited and impoverished their peoples, and systematically destroyed, devastated and contaminated their natural heritage and sources of sustenance" (Acción Ecológica 2002).
